EDUCATION

B.S. Computer Science

Expected 05/2027

Minor in Project Management

Arizona State University, Tempe, AZ

3.75 GPA

RELEVANT COURSEWORK

Data Structures and Algorithms | Object Oriented Programming | Intro to Programming Languages | Digital Design Fundamentals

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, MATLAB, C++, Python, TypeScript

Front-End: HTML, CSS, React.JS, Material UI

Tools, Databases, and OS: Git, GitHub, Windows, MacOS, Word, Excel, API, Pandas, Machine Learning, Agile, Scrum, Trello, Raylib

EXPERIENCE

Software Engineering Intern at JP Morgan Chase & Co.

06/ 2025 – 08/2025

- Led full-stack development of a modernized internal communication tool, leveraging Spring Boot, Java, and React to improve accessibility and efficiency.
- Engineered scalable API integrations and intuitive front-end interfaces to streamline employee connectivity.
- Operated within an Agile framework, contributing to iterative development through daily standups and cross-functional collaboration.

JPMorgan Chase & Co. Data For Good Hackathon Winner

04/2025

- Led development of a full-stack data visualization platform during J.P. Morgan's Data for Good Hackathon, winning **1st place** out of all competing teams.
- Designed and implemented AI-powered insights tools (Insight.AI chatbot, persona builder) to support data-driven outreach strategies for The Concilio, a Dallas-based nonprofit.
- Collaborated with a cross-functional team to deliver real-time dashboards and interactive community maps using **Next.js**, **FastAPI**, **Mapbox**, and **OpenAI APIs** within a 24-hour sprint.

PROJECTS

Premier League Match Predictor, Personal Project

09/2024

- Built a **Machine Learning** model in **Python** using **Pandas** to predict future Premier League match outcomes, utilizing data scrapping for historical match data collection and preprocessing. Leading to a **70%** success rate in predicting match winners

Project Spyn, Class Project

08/2023

- Developed an autonomous car within a team that has the capabilities to obey traffic light controls and pickup/drop off passengers through light and motion sensors.
- Developed code within **MATLAB** to be programmed onto the car using an **Arduino** board.

EXTRACURRICULAR EXPERIENCE

Founder and President of ColorStack at ASU: Tempe, AZ

08/2024 – Current

- Developed a safe place and sense of community for over 70+ Black and Latinx students pursuing CS, projected to double in membership size over the next year.
- Planned and held CS-focused technical meetings led by companies such as American Express, Meta, Amazon, Google, and many others.

Region VI Vice Chairperson of National Society of Black Engineer

05/2025 – Current

- Supporting the Regional Chairperson in overseeing university chapters across the West Coast and driving strategic initiatives to strengthen student engagement and chapter development.
- Co-leading the planning and execution of the Fall Regional Conference, a premier recruiting event where 30+ top companies connect directly with diverse engineering talent for internship and full-time opportunities.

Vice President of National Society of Black Engineers: Tempe, AZ

05/2024 – 05/2025

- Led a dynamic annual fair, raising an impressive **\$42,000** in funds and securing participation from 10 leading companies, while also orchestrating a 20-student delegation for a pivotal regional conference, showcasing exceptional organizational and leadership skills.
- Amplified user engagement by **30%** through proactive updates and alerts, while fostering collaboration with multiple industry leaders to invite guest speakers and actively engaging members through regular meeting presentations.

Pinterest Engage Scholar

11/2024 – Current

- Selected as one of 31 scholars for Pinterest Development Program, aimed at advancing underrepresented talent in tech through technical training, interview prep, mentorship, and professional development.
